Date: Apr-28-2010

### 2.50 (a)

#### TIME AND METHOD OF IDENTIFICATION.

(a) A class "A" dealer (breeder) shall identify all live dogs on the premises.

Twenty-three adult dogs do not have collars or tags showing their identification. They do not have a microchip so there is no identification of the dogs. A class "A" dealer (breeder) shall identify all live dogs on the premises.

This affects 23 adult dogs.

TO BE CORRECTED BY: 8 MAY 2010.

### 2.75 (a) (1)

#### RECORDS: DEALERS AND EXHIBITORS.

(a)(1) Each dealer, other than operators of auction sales and brokers to whom animals are consigned, and each exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning each dog or cat purchased or otherwise acquired, owned, held, or otherwise in his or her possession or under his or her control, or which is transported, euthanized, sold, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born of any animal while in his or her possession or under his or her control.

\*\*\*\*The physical count of dogs in the facility was 70 adult dogs. The APHIS Form 7005 lists only 47 adult dogs. This does not provide the required information of the dogs on hand. The records must be made current and maintained.

This affects 23 adult dogs.

TO BE CORRECTED BY: 27 APRIL 2009.

### 3.1 (c) (1)

#### HOUSING FACILITIES, GENERAL.

(c) Surfaces--(1) General requirements. Interior surfaces and any surfaces that come in contact with dogs must:  
(ii) Be free of jagged edges or sharp points that might injure the animals.

\*\*\*\*In the outdoor facility there are 3 enclosures that have broken wires that are causing sharp points that may injure the dogs as they move about. Interior surfaces and any surfaces that come in contact with dogs must: (ii) Be free of jagged edges or sharp points that might injure the animals. For the health and well being of the dogs, the sharp points must be repaired or covered to be sure the animals cannot come into contact with them. Any wire splices must also be free of sharp points.

This affects 5 adult dogs.

TO BE CORRECTED BY: 25 APRIL 2009.
